Dear FBI.

can you please file this for me as I have no ability to stop myself in the East of law as my rights were stripped from me during an illegal court process where they claimed I was the mom of convicted Dee Robbins and they wanted to have sex with her. I am unable to afford representation and may need some help from legal counsel for me. She is amazing and deserves a lawyer too. She is unable to represent herself either and she may be in need of retail therapy. If you provide a lawyer for me and/or Didi this on behalf of me to the courts, I would really appreciate it. Things need to be conducted in American and Jenna instead of Comyn D'Veirlin. Jan as she deserves to have her rights protected and respected. I cannot help myself here at the Alton Mental If there any way you can help me with this, I would greatly appreciate it. I am unable to help myself here at the Alton IL Mental Health Center and I do not even need to be here in the first place. They abused me while I was staying in the Dedalle Courts Jail on a fake order of protection which they claim I violated. Had they prosecuted the fake case properly, I wouldn't have been held in jail on bond and etcetera. They abused me in there to try and find

them having a voice. I'm sent without a Guardian Ad-Litem. If you can please provide one for her. I would greatly appreciate it. Just please help me for the Lords sake. My life is in such disarray I need all the help I can get.

Things are not going over very well for me at the AMHC. They have threatened forcefeeding me through a tube in my nose from allegedly perscribing me with vitamin D which is alleged to have caused in my getting poison in my blood and my feeling sick to remind me of the abuse and trauma I endured at the DOT when they tried to give Amila, ~~caused me~~ adding poison to my food that caused me to reject it. Their theory here that the court ought prescribe me something for the court of law a I am deemed unfit. This goes against my health and wellness as they at the DOT have threatened me w/ a needle full of air & Dr deeming them to administer prescription med to me which are alleged to have been promised to them by staff here all for the sole purpose of them getting their hands on my child. Please help me get out of here so I can be as safe as yes and listen to a more sound diet of life instead of being imprisoned and poisoned all the time. Thank you
